ORIGEN DE LA IDEA Y NECESIDAD

**SU-BES01-2018-2019-2020:
Human factors, and social,
societal, and organisational
aspects of border and
external security**

Sub-topic 2: [2019] Modelling, predicting, and dealing with migration flows to avoid tensions and violence

Better modelling and predicting migration flows, based on a sound analysis and taking into account gender aspects, is required for high-level strategic decision-making, to plan and implement operational activities. For the management of the migratory flow, including relocations within the EU, it is necessary to map public sentiment, including perceptions of migration, by analysing data available from many different governmental or public sources, and by developing socio-economic indicators of integration strategies. Proposals should be solution-oriented and propose convincingly how to better deal with such flows and to reduce risks of tensions and violence among migrants and European citizens. Participation of Border or Coast Guards Authorities or those working with at-risk groups, for example first responders, municipalities, social workers, educators, civil society actors etc. is welcome.
