COMPLEMENTARIETAT en el know how i en la capacitat de desenvolupar nous productes i serveis

- Portar a terme la recerca i desenvolupar, des de l'inici, els productes i serveis adaptats als diferents mercats.
- Reforçar les capacitats tecnològiques de la mà de socis tecnològicament molt avançats.
- Obertura a nous mercats internacionals.
- Vigilància: identificació de noves necessitats en diferents mercats.
- Programes de finançament específics per projectes internacionals.
- Millora de la imatge de l'empresa com a promotora de projectes internacionals

Presentació convocatòria NUCLIS R+D Green 2023

Importància de l'Acord de Consorci entre els socis internacionals

- Relació amb el soci internacional: l'acord en regula la relació.
- Definició clara de tasques de cada soci.
- Establir el repartiment de la IPR (si s'escau) i a futur l'explotació de resultats.
- Permetre a ACCIO accés al soci internacional per validar l'execució del projecte.

Catalonia Open Challenges

Welcome to the **Catalonia Open Challenges** platform!

This space is the meeting point for those who pose challenges and those who generate opportunities between Catalan and international companies and organizations.

Here you will be able to publish, as well as find and present yourself to different international business challenges and opportunities:

- **Open Innovation Challenges:** challenges from different companies, administrations, and large corporations, Catalan and from all over the world, looking for innovative solutions and proposals.
- **R&D and innovation partners:** local and international collaborative projects, looking for partners with complementary technologies and knowledge.
- **Public procurement:** the best public procurement opportunities around the world, both in the field of innovative public procurement and international public procurement.
- **International trade:** opportunities and demands for products or services looking for suppliers.

Non-contact liquid level into plastic tanks

Updated on June 12, 2023 — Expires on September 14, 2023

Marc Vizern

Business Development Manager

Description of the current consortium (if any):

At Rotimpres, innovation and growth are at the heart of everything we do. We have leveraged our expertise in the graphic arts sector to specialize in printed electronics, and offer cutting-edge, personalized solutions for various markets and applications.

Currently, we are seeking partners to join us in a consortium aimed at developing a low-cost liquid level control solution that can be easily integrated into tanks, so the installation would be made into the tank producer plan and the process could be controlled by the quality standards of the company.

Type&role of partner sought:

We are seeking two key partners to collaborate with us on this project.

First, we are looking for a tank producer who is interested in working with us to integrate our printed sensor technology into their plastic tank design. This partner will be responsible for conducting the necessary research to ensure successful integration of the sensor into the tank.

Secondly, we are seeking an electronic developer to join our consortium and collaborate with us on optimizing the detection and signal processing capabilities of our printed sensor technology. This partner will be responsible for conducting research to identify the best approach to detect and process the signal from our printed sensor, to ensure that the information provided to the user is accurate and reliable.

Join our consortium and help us create the next-generation liquid level control system that will revolutionize the industry.
