DE-RISK CONSTRUCTION

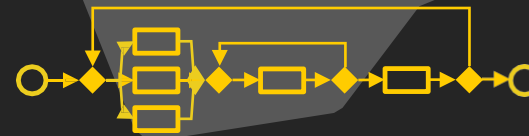

INEFFICIENCY

THROUGH WORKFLOW CONTROL

THE ICEBERG

Construction projects are like icebergs. The visible part is the onsite physical construction. However, this visible part requires the proper management of the non-physical assets of the project and across departments such as the program, documents, consents, contracts or quality procedures.

ONSITE PHYSICAL CONSTRUCTION

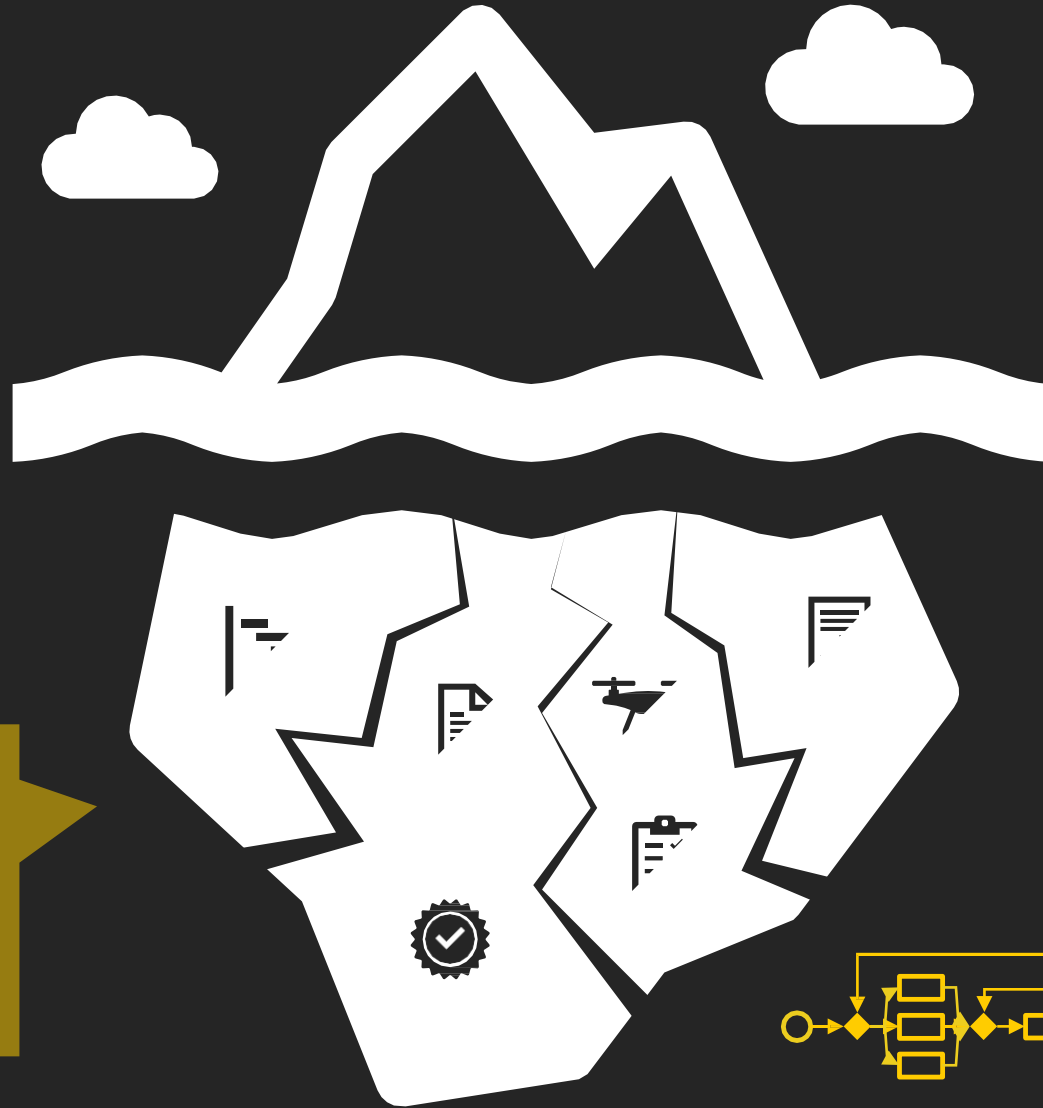

FORMAL OR INFORMAL WORKFLOWS

RIS

Project offices or **corporate departments** run, thousands of repetitive workflows to generate, classify, review and approve aspects related to these assets. Their execution entails risks, resulting often in delays and budget overruns. The sector lacks real-time workflow risk management tools.

DIGITAL ECOSYSTEM

Companies use digital management tools, e-mail, spreadsheets and even physical paper; and they need to tackle with data fragmentation and lack of interoperability.

 **COLLECT**

 **AUTOMATE**

 **CONTROL**

 **LEARN**

Difficult to effectively collect workflow data, automate and control workflows and learn them, because of data fragmentation.

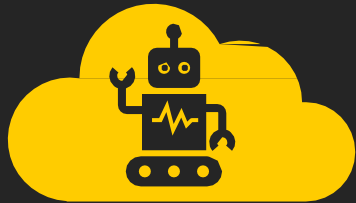

LACK OF WORKFLOW CONTROL IS A
RISK
IN CONSTRUCTION

WORKFLOW SUITE

INTEROPERABLE

REAL-TIME

NON-INTRUSIVE

Beawre's suite does not change your digital ecosystem or modify your workflows. We connect to your ecosystem, collect evidence and capture how your workflows evolve. Non-intrusiveness is one of our main principles.

COLLECT

Build cloud and mobile form-based apps to collect data

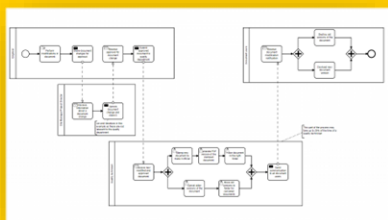

AUTOMATE WORKFLOWS
OVER FRAGMENTED DATA

AUTOMATE

Save up to 50% of the
time of your team

WORK SMARTER
NOT HARDER!

8

CONTROL

Control risks on your workflows
in real-time to avoid delays and
budget overruns

CONTROL RISKS IN
REAL-TIME

DYNABIC

Dynamic Business Continuity and Response of
Critical Systems against advanced cyber-
physical threats

Main contributions

- The **DYNABIC Framework** to predict, quantitatively assess and mitigate in real-time business continuity risks and their potential cascading effects.
- By enabling the **dynamic autonomous adaptation** of critical infrastructures to **meet Resilience goals** by the automatic optimization and orchestration of response strategies.

Project Facts

- **Project Coordinator:** Tecnalía
- **Consortium:** 16 partners
- **Budget:** € 4,999,695
- **Project Type:** RIA
- **Grant Agreement ID:** 101070455
- **Start Date:** 01/12/2022
- **Duration:** 3 years

PROVEÏDOR TECNOLÒGIC:
GESTIÓ CONTINUA DE RISCOS
SOBRE PROCESSOS DE NEGOCI
BASADA EN L'ÚS DE LA IA

LÍDER DE WP TÈCNIC

LÍDER D'INTEGRACIÓ

LÍDER D'EXPLOTACIÓ

- 1** La xarxa genera oportunitats
- 2** L'actitud genera oportunitats
- 3** Eines per part de la UE: Partner Search on the Funding & Tenders Portal, Horizon Europe Info Days, Acció, etc

- 1** Reducció de risc i impuls per a desenvolupament de pilots innovadors
- 2** Oportunitats d'aprendre d'altres socis beneficiaris (coneixement tecnològic, tendències a la tecnologia, etc)
- 3** Involucrant potencials clients com a cas d'ús

ADICTIUS!

PÈRDUA DE FOCUS

- 1** Resilient Infrastructure
- 2** Cybersecurity

10+ Projectes R&D (FP7, H2020, HEU)

20+ Patents aprovades (+20 en avaluació)

80+ Articles científics publicats

250+ Aparicions en premsa especialitzada
