# Què és Horizon Europe

Horizon Europe és el Programa Marc de Recerca i Innovació de la Unió Europea (UE) en el qual la Comissió Europea dedicarà un pressupost de 95.500 M€ durant el període 2021 – 2027.

# Horizon Europe – Normativa de participació

Criteri mínim d' elegibilitat: Participació de 3 entitats independents de 3 estats membres de la UE o Estats associats

Pressupost de projecte > 500.000€

Tipologies d'accions vinculades a les convocatòries: RIA, IA i CSA

Durada del projecte: entre 1 i 5 anys

Encaixar amb les línies estratègiques proposades a la convocatòria (top-down)

Aportar un valor afegit a nivell europeu i responen a les necessitats de millora existents a la CE

Els resultats són propietat del beneficiari que els genera

# Principals tipologies d'accions

Type of action	Funding rate	TRL (ca.)	Aim of the action
RIA Research and Innovation Action	100% of the eligible costs for all types of organizations	2-6	Establish new knowledge and/or to explore the feasibility of a new or improved technology, product, process, service or solution
IA Innovation Action	70 % of the eligible costs for profit-making legal entities  100 % of the eligible costs for non-profit legal entities	4-8	Produce plans and arrangements or designs for new, altered or improved products, processes or services
CSA Coordination and Support Action	100% of the eligible costs for all types of organizations	-	Contribute to the objectives of the Horizon Europe programme, excluding research and innovation activities

Horizon Europe - Work Programme 2026-2027  
Digital, Industry and Space

The re-integration of side streams in the production cycle can take place within one sector or across sectors (industrial symbiosis). Impacts of regulations must be considered and proposals for their modification and/or enhancement should be suggested where required.

Proposals should include a business case and exploitation strategy, as outlined in the introduction to this Destination.

This topic implements the co-programmed European Partnerships Processes4Planet and Clean Steel.

**HORIZON-CL4-2026-01-MAT-PROD-05: Circular innovative advanced materials: facilitating the transition from design to markets (RIA) (Innovative Advanced Materials for the EU and Made in Europe partnerships)**

<b>Call: INDUSTRY</b>	
<b>Specific conditions</b>	
<i>Expected EU contribution per project</i>	The Commission estimates that an EU contribution of between EUR 5.00 and 6.50 million would allow these outcomes to be addressed appropriately. Nonetheless, this does not preclude submission and selection of a proposal requesting different amounts.
<i>Indicative budget</i>	The total indicative budget for the topic is EUR 37.00 million.
<i>Type of Action</i>	Research and Innovation Actions
<i>Admissibility conditions</i>	The conditions are described in General Annex A. The following exceptions apply:  In order to include a business case and exploitation strategy, as outlined in the introduction to this Destination, the page limit in part B of the General Annexes is exceptionally extended by 3 pages.
<i>Technology Readiness Level</i>	Activities are expected to start at TRL 4-5 and achieve TRL 6 by the end of the project – see General Annex B.
<i>Procedure</i>	The procedure is described in General Annex F. The following exceptions apply:  To ensure a balanced portfolio covering strategic value chains, grants will be awarded to applications not only in order of ranking but at least also to one proposal that is the highest ranked from each of the following areas: (i) mobility and (ii) medical devices; provided that the applications attain all thresholds.
<i>Legal and financial set-up of the Grant Agreements</i>	The rules are described in General Annex G. The following exceptions apply:  The granting authority may, up to 4 years after the end of the action,

Horizon Europe - Work Programme 2026-2027  
Digital, Industry and Space

	object to a transfer of ownership or to the exclusive licensing of results, as set out in the specific provision of Annex 5.  Eligible costs will take the form of a lump sum as defined in the Decision of 7 July 2021 authorising the use of lump sum contributions under the Horizon Europe Programme – the Framework Programme for Research and Innovation (2021-2027) – and in actions under the Research and Training Programme of the European Atomic Energy Community (2021-2025) <sup>41</sup> .
--	---

**Expected Outcome:**

- Innovative advanced materials designed for circularity are adopted in products faster, through accelerated production and technology uptake;
- Business models become available to enhance the use of circular innovative advanced materials in strategic value chains; and
- Resource efficiency (materials and energy) is increased significantly through a focus on circular advanced materials.
- Quality standards, harmonisation and regulatory requirements are addressed facilitating simplified market transition.

**Scope:** The focus of this topic is on enabling circularity and resilient supply networks through R&I in advanced materials, in particular recyclable polymers and composites, magnets and metal (alloys) for additive manufacturing, and on accelerating their pathway to market. Proposals should develop new innovative advanced materials (IAMs) with superior or novel functionalities designed for circularity. The scope includes necessary developments of related processes and technologies to ensure integration in industrial manufacturing facilitating uptake of the developed solutions. Proposals should also develop circular business models considering the cost of changes needed along the life cycle of these new materials to facilitate their uptake.

The scope covers the full innovation cycle from the design for circularity and functional integration (new materials designs), development and scaleup (including scalable recovery, recycling and valorisation at end of life), to demonstration of industrial uptake and integration into products. The transformative potential of the developed solutions is to be showcased by demonstrators and industrial use cases. Projects should also explore possibilities to transfer developed solutions to other applications or sectors.

<sup>41</sup> This decision is available on the Funding and Tenders Portal, in the reference documents section for Horizon Europe, under 'Simplified costs decisions' or through this link: [https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/horizon/guidance/simplified-costs-decision\\_he\\_en.pdf](https://ec.europa.eu/info/funding-tenders/opportunities/docs/2021-2027/horizon/guidance/simplified-costs-decision_he_en.pdf)

The SSbD framework<sup>42</sup> should guide the innovation process towards safer and more sustainable chemicals and advanced materials. Where relevant data generated within the proposal may be shared with the Common Data Platform for Chemicals. The new alternatives to be developed should meet the technical functions required in the specific applications while aligning their innovation process decision making with such framework.

Best use of digital tools and FAIR data, including AI and data-driven approaches throughout the innovation process should support the circular transition for industry and circular product design. This includes sharing FAIR and interoperable data and tools across supply networks and value chains, to foster circularity, including data needed for materials and component development, production and circular product design. Proposals should adhere to the FAIR data principles and adopt wherever relevant, data standards and data sharing/access good practices.

The approach should foster collaboration among stakeholders along the innovation chain and industrial value networks to accelerate the development and adoption of new circular solutions.

Projects should build on, or seek collaboration with, existing projects in EU Member States and Associated Countries and develop synergies with other relevant European, national or regional initiatives, funding programmes and platforms, in particular with the Materials Commons for Europe.

Proposals should support strategic value chains in the fields of mobility and medical devices. The portfolio approach will be used to fund at least one proposal from each of these two areas. Proposers should declare in their proposal the main application area of their proposal (i.e. mobility or medical devices).

Proposals should include a business case and exploitation strategy, as outlined in the introduction to this Destination.

This topic implements the co-programmed European Partnerships Innovative Advanced Materials for the EU (IAM4EU) and Made in Europe (MiE).

**HORIZON-CL4-2027-01-MAT-PROD-06: Circular innovative advanced materials: facilitating the transition from design to markets (RIA) (Innovative Advanced Materials for the EU and Made in Europe partnerships)**

## Successful R&I in Europe 2026 – Description

Gain an impression of „Successful R&I in Europe 2025: 12th European Networking Event“ in Düsseldorf, Germany.

Become part of European networks for research and innovation and get ready for Horizon Europe!

We look forward to welcoming you!

Ministry of Culture and Science  
of the State of  
North Rhine-Westphalia

You can still submit a proposal for the Call for Presentations, which is open until 4 January 2026!

For the thirteenth time, the conference invites researchers and entrepreneurs from North Rhine-Westphalia and regions in Europe and beyond to find new research and innovation (R&I) partners for Horizon Europe projects.

Participants are invited to become involved in established and new technology networks between researchers, entrepreneurs and multipliers.

**The networking event is structured in parallel workshops focussing on eight topics:**

- Cluster 1: Health
- Cluster 2: Creative Industries
- Cluster 3: Civil Security for Society
- Cluster 4: Digital Technologies
- Cluster 4: Industrial Technologies
- Cluster 5: Energy
- Cluster 5: Mobility
- Cluster 6: Food, Bioeconomy, Natural Resources, Agriculture and Environment

Horizon Europe, Pillar II

- Cluster 4 (Manufacturing, Production, Building, Steel, Circular Economy, Raw Materials, Advanced Materials, Digital, AI, Data, Robotics, Photonics & Quantum technologies,...)

# Servei d'assessorament en propietat intel·lectual i industrial

## Protecció de la propietat intel·lectual i industrial

Què ofereix? | A qui va dirigit?

El Servei d'assessorament en propietat intel·lectual i industrial disposa de diverses iniciatives per facilitar i acompanyar a les empreses i entitats en la seva estratègia de protecció de la innovació.

1. **Test d'autodiagnosi.** Fins a quin punt la teva empresa ha treballat la propietat intel·lectual? Aquest **test on-line** et permetrà conèixer l'estat actual de protecció de la teva innovació i et donarà unes pautes inicials per fer els primers passos. [Posa't a prova amb el test!](#)
2. **Orientació i assessorament inicial.** Assessorar a l'empresa sobre la modalitat més adequada de protecció de la seva innovació: valorar la millor estratègia de protecció del coneixement, suport en la tramitació del registre o el manteniment de drets o l'acompanyament en el procés de sol·licitud.
3. **Diagnòstic estratègic** de la gestió de la propietat industrial i intel·lectual. A través d'una metodologia creada per ACCIÓ, l'empresa rebrà un informe detallat sobre la gestió dels seus actius intangibles i una proposta d'actuacions de futur per millorar la innovació i la gestió del coneixement.
4. **Tallers de sensibilització i de capacitació.** ACCIÓ organitza sessions i jornades de sensibilització sobre la propietat industrial i intel·lectual dirigides a millorar el coneixement i la seva gestió.
