A smart voice assistant for the factory and industry 4.0

Ref: TOUK20180522001

Details

Title:	A smart voice assistant for the factory and industry 4.0
POD Reference:	TOUK20180522001
	Public Link
Summary:	A small company in the East of England has launched a voice assistant for manufacturing teams. Using natural language processing (NLP) technology, it allows the machines to understand human commands and fill any gaps in data collection. This hands-free system saves time, reduces waste, and improves quality of data. Machine building and other manufacturers are sought for commercial agreements with technical assistance.
Description:	<p>Voice assistants are best known in the commercial sector with products such as Siri, Alexa and Google Assistant. They allow hands-free connectivity to friends, family and the internet. As they rely on cutting edge NLP technologies, their accuracy rates are approximating human levels.</p> <p>A small UK company has been working on rolling out IoT (Internet of Things) and Industry 4.0 solutions for a number of years. Based on customer feedback, they have developed a voice assistant for manufacturing. Staff will save time and reduce waste by allowing users to talk to their factory, using conversations to create work orders, log asset information, or retrieve data. The assistant interfaces to existing asset management systems, eliminates double handling of information, and allows teams to spend more time on the factory floor.</p> <p>It is worth noting that the language engine is not just speech-to-text. It creates true dialogues so that the assistant understands different intents and contexts, and will ask follow up questions such as "What is the due date for this work order?" or "Which asset would you like to set an alert for?".</p> <p>The assistant securely connects to the existing in-house asset management or condition monitoring platforms, or in case of interest, the UK company can help roll out a new platform.</p> <p>Manufacturing businesses across Europe are sought for commercial agreements with technical assistance. The solution is not limited to a specific sector but it has been validated on food production and automotive type use cases.</p> <p>As of now, the language engine is based on English but may be adapted to other languages on request.</p>
Advantages and Innovations:	<p>The innovation lies in combining several pieces of technology to create a new type of product. To the best of our knowledge it is currently totally unique.</p> <p>The advantages include time savings, but also visibility of information and adaptability to changing circumstances.</p>
Stage of Development:	Field tested/evaluated
IPR status:	Secret Know-how
Profile Origin:	Private (in-house) research
Deadline Date:	23 May 2019

German purchasing agency for industrial equipment seeks new products for their business platform

Ref: BRDE20181129001

Details

Title:	German purchasing agency for industrial equipment seeks new products for their business platform
POD Reference:	BRDE20181129001
	Public Link
Summary:	A German company, provider of a business platform for industrial equipment, seeks innovative products, like advanced industry 4.0 solutions, sensors and workplace systems. The products will be distributed via the company's platform in Germany and Europe. The company is interested in distribution services or commercial agency agreements with international manufacturers of relevant products.
Description:	<p>A German company from the metropolitan region Frankfurt/Rhine-Main offers a business platform for international companies and start-ups in Germany and Europe.</p> <p>In the course of the succession, an established wholesale trading business for industrial equipment is going to be developed into a business platform for international companies (manufacturers, suppliers and industrial companies), focused on industry 4.0, sensors and industrial equipment. This will be a network of customers, suppliers and service providers.</p> <p>The primary wholesale trade for workplace systems and industry wholesale has been operating for more than 20 years. Leading industrial companies belong to the clientele.</p> <p>To develop the business, the company is now looking for new, innovative products for the platform. The products will be distributed via the platform in Germany and Europe.</p> <p>The company is interested in the following products:</p> <ul style="list-style-type: none"> - Highly advanced industry 4.0 solutions - Very high performance sensors or sensors which measure unique properties - High-end industrial equipment like workplace systems, tools for lean management <p>The German company is interested in working together with international manufacturers under a commercial agency or an exclusive distribution services agreement for the German market.</p>
Advantages and Innovations:	<ul style="list-style-type: none"> - already existing client base as the wholesale business for workplace systems and industrial equipment has existed for more than 20 years - comprehensive expertise in international purchasing and sales - almost 20 years of international management experience
Technical Specification or Expertise Sought:	<p>innovative solutions für industry 4.0 applications</p> <p>high performance sensors or sensors with unique measure properties</p> <p>high-end industrial equipment like workplace systems, tools for lean management</p>
Deadline Date:	10 Dec 2019

Description

Title:	EEN Brokerage Event during HANNOVER MESSE 2019 "Technology & Business Cooperation Days"
Publish on:	Intranet and Public Website
Type:	Brokerage Event
Start Date:	01 Apr 2019
End Date:	04 Apr 2019
Closing Date:	01 Apr 2020
City:	Hannover
Country:	Germany
Description:	<p>The real Enterprise Europe Network brokerage event during Hannover Messe 2019 "Technology & Business Cooperation Days" takes place from 01.04. - 04.04.2019 during the HANNOVER MESSE 2019.</p> <p>This event is organised by the local Enterprise Europe Network partner (NBank Hannover) together with the swedish network partner (ALMI Foretragspartner Jonkoping) and many other network partners ensuring a strong participation of German, Swedish and international participants. The partner country of the HANNOVER MESSE 2019 is Sweden, so that many interesting swedish companies are expected as participants.</p> <p>With the "Technology & Business Cooperation Days 2019" Enterprise Europe Network Niedersachsen will to continue the great success of the 2018 edition with 600 participants from 38 countries (180 from Germany), the support of 96 network partners and 12 other partners (e.g. NCP Energy, NCP Production, industrial and automotive cluster organisations,...).</p> <p>HANNOVER MESSE 2019 will be the world's leading showcase for new industrial technologies, materials and product ideas. It is the ideal place to obtain latest industrial know-how.</p> <p>The trade fair topics are integrated industry, industry 4.0, integrated energy, smart materials & coatings, predictive Maintenance, cobots, energy efficiency and digital twin.</p> <p>The brokerage event offers SMEs and research organisations the opportunity to find and meet partners for commercial agreements and for research & technology cooperation in the above mentioned fields.</p> <p>The event is the place to acquire new technologies, concepts and solutions as well to get in contact with potential suppliers and business partners to foster the international marketing and sales of already existing products and services.</p>

The screenshot shows the EEN Catalunya website. At the top, there is a blue header with the logo 'enterprise europe network CATALUNYA'. Below the header, there are navigation links: 'SERVEIS', 'FINANÇAMENT', 'ESDEVENIMENTS', 'CASOS D'ÈXIT', and 'QUI SOM'. A large blue banner reads 'A prop teu per fer-te créixer internacionalment' with a bar chart icon. Below this, there are two buttons: 'Dona't d'alta' (highlighted with a red circle) and 'Identifica't'. To the right of these buttons, the text says 'Innovació i creixement internacional per a les pimes'. Below the buttons, there are three icons representing 'Cerca de socis', 'Esdeveniments', and 'H2020'. At the bottom, there is a section for 'JORNADES I SEMINARIS' with a list of events.

The screenshot shows an email alert from EEN. The header features the EEN logo and the text 'Business Support on Your Doorstep'. The main heading is 'PARTNER OPPORTUNITY ALERT' followed by 'Dear Blanco Javier,'. The body of the email states: 'Please find below the daily results of your registered query ACC10 - (Mr. Blanco Javier)'. The main content is a 'Refrigerated Air Dryer with Novel Heat Exchanger Technology'. It includes a 'Summary' section, a 'Reference' (TOTR20150707001), 'Country' (Turkey), 'Submitted' date (Jul 07 2015), and 'Updated' date (Aug 04 2015). There is a link 'View Partnering Opportunity'. Below this, there is a 'KEYWORDS' section with 'Market: Other industrial equipment and machinery, Other Industrial Products (not elsewhere classified)' and 'Technology: Cooling technologies, Heat exchangers'.
